

Personal

Name

Antti Koljonen

Email

contactme@ar-koljonen.fi

Place of birth

Suomi / Finland

Gender

Male

Driving license

A, B

Interests

Computer hardware and reverse engineering.

Hiking and bush crafting, practicing survival skills in the wild.

Gaming, mostly on PC.

Cars, mainly the 90's and 00's and working on them. Turbocharged engines.

Antti Koljonen

33 years of age, with overall work experience worth over 10 years.

I study in KAMK, Kajaani University of Applied Sciences, my degree program is bachelor's degree in Information and Communication Technology, and I specialise in Intelligent Systems.

I'm a very practical person, so I'll keep it relatively short. My selling points are punctuality, dependability and trustworthiness. I've worked in industries with a decent bit of challenges with different people, so I'll always find a way to work with other people, no matter their background or what they're like. I'm a problem solver at heart and often there is no such thing as an unsolvable problem, for me anyway.

I have goals, they're set for the next 5 years or so. I intend to also get licensed as an electrician, to further educate myself in hardware specifically. I like to get my hands dirty and dive into the projects that I'm a part of.

I spend my spare time working on mechanical, as well as technical problems and projects. I maintain myself by staying active and I enjoy a clean house.

Work experience

Recruit / Underofficer

2013 - 2013

Finnish Defense Forces, Finland

Military service in the Finnish Defense Forces. I reached the rank of Corporal during my service.

Various titles

2012 - 2021

Various employers, Finland

I've worked in several industries and jobs during my lifetime, of which I've learned many things. I've attained a decent work ethic and basis for good balance in my work.

Within those employers are companies like Sako Oy, Lähitaksi Oy, Digicenter Oy, AC-Cranes Trading Oy, Multicab Oy, Dolmus Oy.

I've worked as a machine handler in cartridge production at Sako Oy

Some odd jobs in construction clean-up and telemarketing, while searching for something I wanted to proceed forward with making a career.

A taxi driver at Lähitaksi, Multicab and Dolmus Oy and a few others, my experience in working with people carries over from these years. I've worked as a taxi driver on the side while studying as well.

A plater-welder and a machinist at AC-Cranes Trading Oy. AC-Cranes is a smaller producer of cranes and lifting equipment in Uusimaa, Finland.

A network technician at Digicenter Oy, some of my tasks entailed things like installing local networking equipment and VoIP communication devices. Some low-level network design tasks.

Education and Qualifications

Trades of Metalworking

Sept 2009 - Jun 2012

HYRIA - Vocational institute in Hyvinkää, Finland

Plater-Welder / Machinist, the base degree for the metalworking industry.

Bachelor's Degree in Information and Communication Technology

Sept 2021 - Now

KAMK - University of Applied Sciences, Kajaani

Specializing in intelligent systems, embedded devices, and a good basis for programming.

My timeline for graduation is set to 2028 summer, the latest.

Skills

C & C++ programming

Python programming

Linux distributions

Office 365 and Linux Office products

Embedded device programming

Hobbies

In my hobby of gaming, I've achieved something that many won't do. I mainly play World of Warcraft, mainly the classic adaptation which is currently in Mists of Pandaria. The team / community I play with, Numen, is at the very top of said game. We've reached several "world first" titles, clearing the released content as the first group in the world to do so.

I've attained a lot of friends during this journey of multiple years, and I cherish this achievement dearly. I've played World of Warcraft games for a better part of 20 years, and I always dreamed of taking it to the very highest level.
